## Table of Contents

1. Brief overview
2. Programs we offer
3. Kindergarten to 3<sup>rd</sup> Grade
4. 4<sup>th</sup>-12<sup>th</sup> Grade Group
5. Math and Science Curriculum Vision
6. School Year Calendar
7. Extracurricular activities
8. Books for Each age group
9. Summer Reading List for students and parents (June 2024)
10. Summary
11. Learning Portal to access videos
12. About the Founder

### **Brief Overview – Vision, Mission and Beliefs**

“What students need fundamentally in academics today is not information, they need inspiration and vision. They can get information from the library as well as Google. Once they are inspired and hardworking, the technology and coaching/teaching available will help them excel in whatever they choose to study. With the technology and tools available, teachers can help students master concepts in Mathematics and Science like never before.”

-Amos Tarfa (Math & Science Curriculum Consultant)

“Education is not filling a bucket, but lighting a fire.” —William Butler

### **Introduction**

At the Life STEM Center For Christian Education, we aim to have teachers who inspire students to have a vision by the grace of God. We use Math and Science History as well as Math and Science Applications and Career details to inspire our students. We are seeking to provide an efficient and effective education alternative for families. We need to constantly seek ways to get students excited about excelling in education and flourishing in life. We seek to inspire every student to have a vision for life and then give them tools to grow in those areas as they prepare for their futures.

Our students who follow our STEM plan can graduate high school with over 30 college credits if they study and pass the relevant CLEP Examinations. This reduces the amount of time they will need to attend college as they will have taken most of their general education requirements.

In a traditional school setting, Children spend about 18,200 hours in school from Kindergarten to 12th grade (Average of 8 hours a day and 175 days each school year-this includes homework time). At the end of that time, we should hope that students have some direction for life, however this does not always happen. This is one area LIFE STEM Center For Christian Education is seeking to change. We want to provide the best STEM education possible while **partnering** with parents in preparing their children to flourish in whatever academic fields they are interested in. If we meet a 5<sup>th</sup> Grader who wants to be an Astrophysicist, we will provide them with a roadmap and any Math and Science support along the way. We will also help find a mentor to work with that student and their family.

We teach our courses from a Christian worldview as we seek to encourage students to grow in the Truth. However we know that there are students who do not have the same worldview we have but we welcome them to join our program to learn with us.

### **Programs we offer**

We offer a homeschool hybrid education option to families where students come to the location of the school from 9am to 3pm 2 days a week. A double hybrid model is the goal for the Life STEM Center For Christian Education where one cohort comes on Mondays & Wednesdays and another cohort comes on Tuesdays & Thursdays.

Each hybrid program will have a unique set up for the students in different grade levels. Our programs seek to focus on mastery and so students stay in the groups that will help them master the material they learning the best. Here is an example of the cohort set up in Moorhead MN.

1. Kindergarten/1<sup>st</sup> Grade Class
2. 2<sup>nd</sup> & 3<sup>rd</sup> Grade Class
3. 4<sup>th</sup> - 5<sup>th</sup> Grade Class
4. 6<sup>th</sup> – 7<sup>th</sup> Grade Class
5. 8<sup>th</sup> – 9<sup>th</sup> Grade Class
6. 10<sup>th</sup>-12<sup>th</sup> Grade Class (Focus on College Courses or courses for College Credit)

### **Summary**

We are offering courses in person 2 days a week while students work on the assignments given the remaining days of the week. Students can follow the lesson plans provided in the books they are using and email if they have questions. We have an online portal of math videos in case they get stuck after reviewing the examples in the book. If a book does not provide a lesson plan or guide, we will create one for the student. Parents also need to let us know if they are planning to do any summer work using our textbooks as this could help their students get ahead. If parents are going on vacation during specific weeks of the school year, please let us know so we can plan accordingly for those weeks. For copies of the lesson plans for the grade level of your specific child, please email Amos Tarfa.

### Sample of Schedule

9am	Chapel - Sing, Bible Lesson & Memory Verse Group Discussions on Character Development - Growing in love, respect, kindness and life skills
10am	Mathematics (students work at their level with instructors available to help)
11am	Science/Science Experiments
12pm	Lunch and Play
1pm	Social Studies: History, Geography or Economics
2pm	English
3pm	Elective Options – Examples include Chess and Choir

### Course Work for K-3

1. Elementary Math
2. Basic Science Concepts and Experiments
3. Language Arts & Social Studies
4. Music
5. Character Development
6. Foreign Language options

### 4<sup>th</sup>- 12<sup>th</sup> Plan

1. Mathematics (Pre-Algebra, Algebra 1, Algebra 2, Geometry, Pre-Calculus, Calculus)
2. English
3. Science (General Science, Physical Science, Biology or Chemistry)
4. History & Social Studies (World History, Economics)
5. Logic/Debate/Apologetics
6. Choir Elective
7. Foreign Language Elective

### After School Electives (available on most campuses)

1. Coding Practice (teaching students how to code) – Online Resource
2. Chess Club
3. Debate Club
4. Soccer and Track

**Note:**

We will have a science fair during the school year and we will help students pick their topics and guide them along the way.

We hope to inspire our students to excel in all areas of life even as King Solomon said in Ecclesiastes - whatever your hand finds to do, do *it* with your might (Ecclesiastes 9:10a)

**Gauss Euler Newton (GEN) Academy of Mathematics****Mathematics**

(Assessments are available to help students see what class will work best for them).

Our Math program is named after the 3 best Mathematicians in modern history. Students will also have access to all the materials for the concepts taught from Arithmetic to Calculus so at any time they have access to materials to review for any math topic. We help students to master concepts in any topics they are learning.

Math Course Offerings (some of these courses are only offered online this school year).

- Elementary School Math (Kindergarten to 3<sup>rd</sup> Grade) – A Focus on Addition, Subtraction, Multiplication and Division (Arithmetic) using Math Mammoth
- PreAlgebra (Middle School Math) – Focused on Fractions, Decimals, Percents, Ratios and Proportions
- Algebra 1
- Algebra 2 (and College Algebra CLEP Preparation)
- Geometry (can be taken in the summer)
- PreCalculus (and CLEP Preparation)
- Calculus 1 (and CLEP Preparation)
- Calculus 2
- Calculus 3
- Linear Algebra
- Differential Equations
- Statistics
- Fourier Transform (Online Only)

**Science (<https://bereanbuilders.com/ecommerce/product-category/senior-high/>)**

Science Courses (some of these courses are online offered online)

- General Science (With Natural Science CLEP Preparation)
- Physical Science (With Natural Science CLEP Preparation)
- Biology (With Biology CLEP Preparation)
- Chemistry (With Chemistry CLEP Preparation)
- Physics & Astronomy
- Earth Science

## **Note on Science and Mathematics**

We are seeking to provide a science and math education that exceeds that which Isaac Newton, Leonhard Euler or Albert Einstein would have received. We want students to have the best education possible and to lead the way in educational excellence in America and beyond especially in the field of science and math.

Our students will do presentations on projects from research topics in Chemistry, Biology, Astronomy and Medicine. They will better understand what the goals of several research projects were and how they might be able to improve on the discoveries and research projects. We teach the history of science as a tool to inspire our students to excellence. Science and Faith can go well together and we see this with a lot of pioneers in science. We want students to learn this as they study the lives of those behind the concepts they learn.

**SCHOOL YEAR CALENDAR** – August 16<sup>th</sup> 2024 to May 16<sup>th</sup> 2025 with Optional 2024 Summer Camps

**For K-3<sup>rd</sup> grade**, we will work with parents to find what is best for that specific student.

### **4th Grade/5th Grade**

Institute For Excellence in Writing & Fix it Grammar  
Handwriting Book (parents can choose any publisher)  
Math Mammoth 4A/4B & 5A/5B & Inspirational Mathematics 1 (PreAlgebra)  
Science in the Scientific Revolution by Dr. Jay Wiles  
From Adam to Us (Notgrass) & Select books from the Literature reading list

### **6th Grade/7<sup>th</sup> Grade**

Institute For Excellence in Writing & Fix it Grammar  
Handwriting Book (parents can choose any publisher)  
Math Mammoth 6A/6B & Inspirational Mathematics 1 (PreAlgebra)  
Science in the Scientific Revolution by Dr. Jay Wiles  
From Adam to Us (Notgrass) & Select books from the Literature reading list

### **7th Grade/8th Grade**

Institute For Excellence in Writing & Fix it Grammar  
Handwriting Book (parents can choose any publisher)  
Inspirational Mathematics 1 (PreAlgebra)/ Inspirational Math 2 (Algebra 1/Algebra 2) – depends on students ability  
Science in the Age of Reason and Industrial Revolution by Dr. Jay Wiles  
From Adam to Us (Notgrass) & Select books from the Literature reading list

**9<sup>th</sup> – 12<sup>th</sup> Grade Courses (students choose classes that they need) – we work with each student and their family to select what is best for them.**

Institute For Excellence in Writing - Modern History Writing Course & U.S History Writing Course

Geometry & PreCalculus/Trigonometry (with PreCalculus CLEP Preparation)

College Algebra (with CLEP Preparation)

Statistics

Calculus (with CLEP Preparation)

Statistics

Calculus 2

Linear Algebra

Physical Science

Biology (with CLEP Preparation)

Chemistry(with CLEP Preparation)

Physics

Anatomy & Physiology

ACT Preparation

Government (1 Semester)

Economics (1 Semester)

World History

U.S History

Logic Book – Dr. Jason Lisle’s Logic Book

John Tiner - The World of Mathematics Book

CLEP Natural Science

CLEP Western Civilization 1

CLEP Western Civilization 2

CLEP Microeconomics

CLEP U.S History 1 and 2

Journey Through Genius or alternative Math History Book

Please note that CLEP tests are optional but we encourage students to take them. CLEP Options for this year:

***Students use the REA book and the Modern States website to study***

**Summer Reading List for students and parents (June 2024)**

Students can read as many as they will like. The books by Amos Tarfa can be found for free on the Living Sensibly Website - <https://livingsensibly.org/>

1. Why Do I Exist by Amos Tarfa
2. Tools For Mastering Mathematics by Amos Tarfa (short book)
3. Pursuing Excellence in Academics by Amos Tarfa (short book)
4. Pursuing Excellence in Character by Amos Tarfa (short book)
5. Diamonds Lost in the Sand by David Freeman

6. Can Science Explain Everything by Dr. John Lennox
7. Biography of George Washington Carver
8. Biography of Benjamin Franklin
9. Peak by Anders Ericsson
10. 7 Men by Eric Metaxas
11. The Diary of Anne Frank
12. The Hiding place by Corrie Ten Boom

We will work to update this list regularly.

### **Book recommendations for parents to consider**

1. Diamonds Lost in the Sand by David Freeman
2. How to Raise your children for Christ by Andrew Murray
3. Dangers of a Shallow faith by A.W. Tozer
4. Why Revival tarries by Leonard Ravenhill
5. America is too young to die by Leonard Ravenhill
6. How should we then live by Dr. Francis Schaeffer

### **COST**

<b>Payment Option</b>	<b>Cost</b>
Upfront Payment Option for hybrid	\$3000
Monthly Payment Option	\$300/month (for 10 months)

If you would like to be considered for a **scholarship or financial aid**, please email [amostarfa1@gmail.com](mailto:amostarfa1@gmail.com).

Children have a lot of potential and we want to partner with families to help their students flourish in all areas of life. We hope to inspire students to have vision for the life they have been blessed.

### **About the Current Director**

Amos Tarfa was born in Nigeria. He came to the United States to get his Bachelors degree in 2007. He got a degree in Chemistry (Pre-Med) with a minor in Philosophy. Before coming to the U.S. he attended Federal Government College, Lagos (FGCL) where he was a Science student for the last 3 years of high school {In Nigeria, Post-elementary education is divided into Junior Secondary School (7th-9th Grade) and Senior Secondary School (10th-12th Grade) where you have to choose a track based on what you want to be when you grow up}. Science students at FGCL take 9 Courses in Chemistry, 6 Courses in Physics, 3 years of Biology, 3 Courses in

Mathematics, 6 Courses in Advanced Mathematics along with courses in Agricultural Science, Geography, English, French and a Nigerian language all in 3 years.

At the university level In Chemistry, he found Biochemistry to be very fascinating and read extra materials in Biochemistry to better understand the implications of some of the issues discussed in this field especially the Blood Clotting Cascade. He took Cell & Molecular Biology in his undergraduate study as well.

As part of the research Amos was involved in while he was in college, he worked with a Microbial Geneticist during his undergraduate days and also after graduating on research involving bacteria.

In Philosophy, he focused on the Philosophy of Science but also took courses in Epistemology, Logic, Philosophy of Religion, Basic Philosophy and Ethics. In the Philosophy of Science, the class examined the Demarcation problem and the history and theory of evolution. This led Amos to do more writing and research on the topic. It also allowed him to learn from people like Prof. John Lennox and other Christian thinkers.

Amos was planning to get a PhD in either the Philosophy of Science or Biochemistry but ended up teaching High School Biology, Mathematics, ACT Prep, Bible and History instead. He did that for 2 years and then started a tutoring center that focused on Math and Science (Learning Institute For Excellence). After tutoring for a few years and running education programs, he went on to get his Masters in Medical Physics and also in Masters in Medical Health Physics. He is a Medical Physicist (with a focus on Diagnostic Medical Physics and Nuclear Medicine Physics) and also works as a Math and Science Consultant & Instructor.

Amos completed 1 year of his PhD program in Chemistry from North Dakota State University (NDSU) in Fargo where he lives with his family and is involved in the local church and he is now focused on running STEM Schools and providing efficient Math Curriculum options to families through his online programs.

He has published a few books including Achieving Excellence as a Young Person (2006), Christianity 201: The Pursuit of Excellence (2010), Principles for Academic Excellence (2019), Pursuing Excellence in Character (2019) and Tools For Mastering Mathematics (2018). He also loves to encourage people of all ages to live for Truth and for the purpose for which God made them. He is married to Stephanie and they have 7 children.

He has a Podcast called Living Sensibly Podcast which is available on iTunes, Spotify and YouTube (under the AmosTarfa Channel).

### **Online Learning Portal**

Students enrolled in the STEM Classical Academy will get access to all the courses listed on this website at no extra cost. We will continue to add Courses to this website regularly. Please let us know if there is a specific course you are looking for if you don't see it here.
